Railtech International and Matweld, Inc. are proud to announce the merging of companies and talents to expand into the future for the railroad industry. Railtech Matweld is now a division of Railtech International, producing American-made tools and proudly serving the railroad industry through innovation, training and service.

Railtech Matweld, Inc. is an international company offering high quality railway products for the entire railroad industry and is your single source for Hydraulic tools and equipment. As an industry specialist, we will meet customer tool and product requirements with current, or custom, manufacturing capabilities that meet specifications for unique applications within urban and transit rail systems.

Railtech Matweld offers after-the-sale training, service and single-source purchase for all items sold. We assist in local support training for your employees or a local support company in your area.
POWER UNITS
The Railtech Matweld Dual Circuit Power Unit is designed to deliver two 5 GPM or one 10 GPM circuits at 2000 PSI. A power unit-mounted hose reel, with a 50 foot hose, is available, as well as various carts and provisions to move the machine manually or power assisted.

**ACCESSORIES:**
- 00187-Kit- 00100K Lift Handle Kit
- 00195- Power Point
- 02326- Hose Reel with 50’ hose and mounting bracket
- 06300- Power Unit Mobility Cart

The Railtech Matweld Track Rover is a hydraulic 4WD mobile work cart powered by a 22hp Kohler Engine. It is ideal for derailment work or to transport railroad maintenance tools and/or supplies to remote areas not easily accessible by conventional high rail methods. The hydraulic-powered dump bed can be converted to a flat bed by removing bed side rails. A 12V DC standard power point is equipped and can be utilized with optional inverter for 120 volt application. Front and rear high intensity halogen lights are provided. Operator control is remote via a hand held radio transmitter.

The Railtech Matweld Rail Saw is a hydraulic powered abrasive rail saw that uses a 14” or 16” diameter blade to cut rail. A sturdy pivot arm securely clamps to the rail and guides the saw during operation. Free axis movement of the tool allows cutting on either side of the rail and clean separations average well under two minutes. Sturdy construction and quality components ensure low maintenance and long life of the tool.

01500 RAIL DRILL

The Railtech Matweld Hydraulic Rail Drill is a small, dependable and efficient maintenance tool that offers cost-effective operation under adverse conditions. Simple clamp and height adjustment mechanisms allow quick set-up time on a variety of track configurations. The drill has a quick-set indexing bar that provides accurate hole spacing. Standard flat spade bits are used and can be changed in seconds without the need for wrenches. The rail drill includes a lubrication system.

The Railtech Matweld Spike Puller is a lightweight powerful maintenance-of-way tool generating 13,000 pounds of pulling force. Safe two-speed design ensures operators grab the spike in a slow speed, avoiding jerking motions common with most spike pullers. The efficient design enables the operator to grab the spike from either side of the rail without repositioning, pull and automatically drop the spike at the top of the stroke in one motion. All moving parts are fully enclosed for safety. The jaws can be changed without special tools in minutes at the work site.
